Jan 14, Feb 11  
Mar 11, Apr 8,  
May 13

At the heart of virtually any successful KT effort is an individual who makes a decision to do something differently. Such individual-level decisions fall squarely within the purview of cognitive psychology but there has been very little consideration of cognitive theories and concepts in the KT literature. This talk will describe some initial efforts:

#### Learning Objectives

- To understand how cognitive psychology fits into broader frameworks of KT
- To learn about theories and concepts from cognitive psychology that may help to improve KT activities
- To learn how cognitive concepts have informed ongoing KT activities such as emergency medicine clinical decision rules

#### To register:

This session is offered by Telehealth (videoconference) from St. Michael's Hospital in Toronto, Canada.

**OTN sites:** Please reserve your studio and ask your coordinators to email [kinachm@smh.toronto.on.ca](mailto:kinachm@smh.toronto.on.ca). OTN Telemedicine coordinators can also self-schedule by clicking on the following link:

<https://schedule.otn.ca/tsm/portal/nonclinical/details.do?request.requestId=8066032>

**Non-OTN sites:** please contact Brad McMillan at [its-videoconf@uwo.ca](mailto:its-videoconf@uwo.ca) to make connection arrangements.

Telemedicine broadcasting made possible by The Joseph L. Rotman Institute of Science and Values at The University of Western Ontario and SACYHN (Southern Alberta Child and Youth Health Network)
