KT Canada National Seminar Series

KT Canada Presents: Stephen Gentles and Janet Jull

Stephen Gentles is a PhD student in the Health Research Methodology Program at McMaster University.

Title: Understanding how parents of children with autism navigate complex information and care

Learning Objectives:

- Understand how informal caregivers in complex informational contexts navigate and participate in care
- Understand the utility of qualitative research for developing local theory that is highly relevant to specific settings
- Appreciate the relevance of health care consumer-centered qualitative research for improving patient-centered care

Janet Jull is an occupational therapist with clinical, health policy and management experience.

Title: Health Decision Making with Aboriginal Women: A qualitative study exploring needs, supports and barriers

Learning Objectives:

- Describe a needs assessment conducted using qualitative research methods
- Describe a collaborative research study
- Introduce concepts of culturally appropriate shared decision making in a framework developed by and with an Aboriginal population

TO REGISTER:

This session is offered by WEBEX from St. Michael's Hospital in Toronto. All registration requests must be sent to Meghan Storey: storeym@smh.ca by Tuesday, May 12th at 5:00 PM ET.
