KT Canada National Seminar Series

KT Canada Presents:

Monika Kastner

Title:

Effectiveness of KT tools addressing multiple high-burden chronic diseases affecting older adults: A systematic review

Learning objectives:

1. Learn about the burden of multiple chronic diseases affecting older adults
2. Understand the potential impact of current KT tools targeting multiple chronic conditions through a systematic review
3. Discuss findings in the context of informing a KT tool aimed at integrating the care of top high-burden chronic conditions affecting seniors

Monika Kastner is a Scientist with the Knowledge Translation Program at the Li Ka Shing Knowledge Institute (LKSki) of St. Michael's Hospital, and Assistant Professor, Division of Epidemiology at the University of Toronto Dalla Lana School of Public Health. Monika's research interests and goals are to make a positive impact on the health of Canadian seniors with the use of innovative knowledge translation (KT) approaches, and to advance the fields of health services research and KT. She has a PhD in e-health/health services research from the University of Toronto Institute of Health Policy, Management and Evaluation (IHPE), and was a CIHR Banting Postdoctoral Fellow. Currently, Monika is developing the Aging well initiative funded by the Ontario Ministry of Health and the CIHR, which involves the development of a unique KT tool that can integrate the care of multiple high-burden chronic diseases affecting seniors.

TO REGISTER:

This session is offered by WEBEX from St. Michael's Hospital in Toronto. All registration requests must be sent to Gail Klein: KleinG@smh.ca by Wednesday, May 11th at 12:00 PM ET.

To register a site: please identify one person who will be in attendance and provide their email address to Gail Klein. To register as an individual; please email Gail Klein.

PLEASE NOTE THAT EVERYONE MUST REGISTER TO ATTEND AS YOU NEED TO BE INVITED INTO THE WEBEX SESSION

Technical requirements: You need a computer with Google Chrome and a telephone or computer microphone or headset.

Each session includes a question and answer period (15 minutes per 1 hour session)
