Strategy for Patient-Oriented Research

SPOR
Putting Patients First 

KT Canada National Seminar Series

KT Canada and the SPOR Evidence Alliance
present: **Dr. Ghazal Fazli & Nicole George**

Dr. Ghazal Fazli

“Nothing About Us, Without Us”: The need for
trauma-informed intersectional analysis of
diabetes risk during COVID-19 through patient and
public engagement

Learning objectives:

1. Understand key concepts in patient and community engagement research
2. Identify meaningful ways to engage with community members and patient partners in health research
3. Understand how trauma-informed intersectionality analysis can be applied in health research involving patient partners and community members

Nicole George

**Community partnerships for equity-oriented
chronic pain care**

Learning objectives:

1. Describe the knowledge to action gap for linkages between clinical pain management and community resources to support the multidimensional experience of living with chronic pain
2. Reflect on inclusive, equitable strategies for public and patient engagement in research
3. Identify knowledge exchange methods to be used for the co-design of community linkages to reduce care fragmentations and health inequities related to chronic pain
