**Biography:**

**Dr. David Campbell** (MD, PhD) is a medical specialist in Endocrinology & Metabolism and a health services researcher focused on social disparities and their impacts on clinical outcomes of cardiometabolic diseases, like diabetes. He is the co-director of the Health Policy Trials Unit at the O'Brien Institute for Public Health at the University of Calgary. He conducts research that uses mixed methods, interventional approaches, community and stakeholder engagement, and knowledge translation to contribute to reducing the impact of social disadvantage on clinical outcomes by informing health policy and clinical practice.
